

SOUL MY16

The Power to Surprise

Express Yourself

Challenging the conventions of small car design, the Soul packs in more room, more space and more comfort than you'd first expect. Never forgo creature comforts with high levels of standard safety and technology features.

The Soul lets you express yourself, with a new range of two-tone exterior colour options.

Stand Out

The Soul is undeniably distinct from all angles. Its design lines interplay with sharp body creases, resulting in a strong on-road presence. Unique 17-inch alloy wheels add a touch of style. It's a car that gets noticed, for shattering expectations, and for offering a new take on urban vehicles.

You'll quickly discover the intricate design details of the Soul up close, from its square-printed interior trim through to its unique side garnishes.

Form Meets Function

Differentiating itself from the rest, the Soul is just as stylish as it is functional. It's spacious, roomy design allows for convenient, easy access in-and-out of the vehicle. Its design ethos of function and form is proudly displayed, and is what separates the Soul from what you'd expect in a small car.

Ease of Use

Once inside the Soul, you'll notice the vastness of its cabin. Its elevated seating position greatly assists in increasing visibility when looking inside and outside of the cabin. It also gives you a great view across the dashboard, where you'll notice the high-quality glossy finishes and soft touch materials that adorn its surfaces.

Fingertip Convenience

Ergonomic design takes precedence inside the Soul. A logical layout for its features and technology results in ease of use. A touchscreen Audio system with USB connectivity and reverse camera display is conveniently located at your fingertips. The unique circular dashboard speakers bring a new depth to your favourite tunes. There's ample storage in both door and centre console areas. It's a place that helps simplify your driving experience.

Ample boot space with 60/40 split rear seats allows you to carry larger loads.

Intuitive Features

Touch Screen Audio System with Reverse Camera

A vivid touchscreen Audio system with reverse camera ensures you are aware of your surroundings before backing up.

Bluetooth® Connectivity with Steering Wheel Control

Easily use the Bluetooth® connectivity system via controls located on the steering wheel. (Not all mobile phones will be compatible with vehicle's Bluetooth® system)

Reverse Parking Sensors

Rear parking sensors alert the driver when a static object is detected while reversing.

FlexSteer System

The dynamic FlexSteer system enables the driver adjust the weight of the steering depending to suit the driving scenario.

Automatic Headlights

Automatic Headlights

The Soul's headlights automatically turn-on when low light conditions are detected.

USB and AUX Input

Stream your favourite music through the Soul's stereo via USB and AUX inputs located conveniently underneath the Audio system.

Efficient Engine

2.0 litre Petrol Engine

A powerful 2.0 Litre four cylinder engine provides 113 kW of power with 191 Nm of torque.

Advanced Safety

Vehicle Stability Management (VSM)

Vehicle Stability Management (VSM) improves stability in low-grip driving conditions.

Hill Assist Control (HAC)

Hill-Start Assist Control (HAC) ensures that the vehicle does not roll backward when taking off from an incline.

Electronic Stability Control (ESC)

Electronic Stability Control reduces skidding to help maintain control in the event you have to brake or swerve suddenly.

Six Airbag System

Protect you and your passengers with Kia's six airbag system.
